Powercontrol V rechargeable battery change, clean and reseal, check over	£56.00
Powercontrol IV (ergometer only) battery change, clean, reseal and check - see note below re PCIV service support	£65.00
Powermeter recalibration	£35.00
Powermeter recalibration SPECIAL PRICE - when done alongside battery change	£30.00
Powermeter decal change (price includes decal)	£30.00
Additional service work	£35.25 /hr
Fitting and Set-up of SRM system to bicycle	from £45.00
Software tutorial and technical support including data analysis, training zones etc	£45.00 / hr
Powerbased training and personal coaching programmes	from £95.00 per month

All prices include VAT at 17.5%

SRM prices quoted include VAT but exclude carriage. Please allow for £8.50 for powercontrol only and £15- £20 for powermeter or system repairs respectively. PLEASE ensure SRM power crank equipment is sent for repair in a clean state otherwise a cleaning charge of £15.00 will be made as the systems need to be clean prior to any electronics work taking place.

Please send the appropriate parts to **SCIENTIFIC COACHING AND SRM-UK; Red Earth House, 14 West End, Pickwell, Leicestershire LE14 2RH UNITED KINGDOM** . Please enclose a covering note together with a copy of your payment confirmation email and make sure you include the return address. Goods are returned via UPS or Royal Mail Special Delivery and will require a signature.

Turn round time is normally 3-5 working days, please enquire if you require an express service. Occasionally equipment will need to be returned to SRM-Germany for complex repair situations - the cost of this will be added to your invoice but we will inform you prior to any action being taken.

Please note that the old PCIV's are obsolete and with the exception of those from High Performance Ergometers may prove impossible to service. Please be aware of this when purchasing 2nd hand systems and please contact us directly with regard to any servicing requirements for PCIV's. THANK YOU
